Minimal Annual Fee!

iMonnit Online Wireless Sensor Monitoring

iMonnit is a secure cloud based monitoring and notification system dedicated to Monnit and ALTA Wireless Sensors and Gateways. The system allows for complete configuration and customization at a sensor, network, or client wide level. iMonnit allows for management of sensor data as well as the ability to setup alerts via text or email to one or many people. It is also accessible from all internet enabled devices including smart phones. **iMonnit Basic** is included for free with all wireless sensors, providing basic features for you to configure and monitor your sensors online. **iMonnit Premiere** allows for enhanced functionality of your wireless sensors and includes an advanced software feature set at a low annual cost. (For complete feature comparison see reverse side.)

System Requirements

- Ethernet gateways require existing Internet connection
- Wireless Sensor Adapter or USB Pro Gateways require a Windows PC or 3rd party IoT gateway

iMONNIT[®]
EXPRESS[™]

PC SOFTWARE FOR SENSORS

iMonnit Express PC Software

iMonnit Express PC Software is an alternative to online monitoring that runs as a standalone PC application without the need for an Internet connection. This system is meant to provide a simple and effective way for customers to manage a smaller network of sensors using on-screen alerts and email notifications to remotely alert the user. iMonnit Express allows for the same basic sensor network configuration and customization as the online version and can be used with all Monnit wireless sensors and gateway products.

Minimum System Requirements

- Windows 10, 8, 7 or Vista with minimum of 1024 MB RAM and 20 Megabytes free disk space
- ASP.NET 3.5

iMONNIT[®]
ENTERPRISE[™]

ENTERPRISE SENSOR SOLUTIONS

iMonnit Enterprise

iMonnit Enterprise is available for large organizations with specific data usage requirements. It provides the same feature set as the iMonnit Premiere online system while allowing the organization to host and maintain their own sensor data.

Minimum System Requirements

- Minimum System: 2 GB RAM, 2.0GHz Processor
Recommended System: 4 GB RAM, 2 x 2.0GHz Processor
- Windows Server® 2012 or Newer, Web Server IIS 7, ASP.NET 4.5, ASP.Net MVC Framework v4.0
- SQL Server® 2008 or Newer (Database Server)
