

Panel Meters: Vertu™ Series

VPM2000 Loop-powered Isolator/Alarm with Display

Loop-powered Process Meter ♦ 4-20mA input/output ♦ Solid-state Relays ♦ Non-incendive, Intrinsically Safe

Description

These loop-powered 1/8 DIN digital panel meters provide a convenient and informative display of any 4-20mA signal. A dual line display shows the process value on the top line and the units or a tag on the bottom line. Alternatively, you can display the input in one scale on the top line (e.g. height) and another scale on the bottom (e.g. volume). A bargraph option indicates the percentage the value represents.

All models include a digital input and two open collector outputs. For signal isolator and alarm trip applications, model options add two solid state relays or 4-20mA analog output. The digital input enables remote reset or triggering of alarms. Open collector outputs are useful for alarm indication or pulse output. Relays support alarm activation, on/off control, and pump alternation functions.

Installation is greatly simplified as the meters acquire power from the 4-20mA loop and therefore require no separate power source. A low voltage drop adds very little burden to the loop. The NEMA 4X IP65 panel, conformal-coated PCBs, wide temperature operation, and a backlit LCD enable use in most environments. Intrinsically safe and non-incendive versions allow installation in hazardous areas.

Setup is fast and easy using the front panel buttons or the free configuration software. A micro USB cable connects the meter to the PC and provides power for software-based programming and saving the file. The pushbuttons also serve as programmable function keys to change displays, reset min/max readings, acknowledge alarms, and other uses.

Key Features & Benefits

- Loop-powered process meter
- 4-20mA input
- Two open collector outputs standard
- Optional loop-powered solid-state relays
- Optional 4-20mA analog output
- 1.5 volt drop (4.5 volt drop with backlight)
- Loop-powered backlight with red backlight for alarm conditions
- Free PC-based USB programming software
- 5-digit alphanumeric top line, 8-digit alphanumeric bottom line
- 20-segment bargraph with percent indication
- Relay pump alternation based on level and runtime
- Display relay runtime and cycle count
- UL/CUL 61010 listed for electrical safety
- UL/CUL listed as intrinsically safe and non-incendive
- -40 to 167°F (-40 to 75°C) safe area operating temperature range

Panel Meters: Vertu™ Series

Performance Specifications

General

Except where noted all specs apply to operation at +25°C.

Temperature Range

Operating (safe area models): -40 to 75°C.

Operating (hazardous area models): -40 to 70°C.

Storage: -40 to 85°C.

Relative Humidity

0 to 90% non-condensing. PCBs conformal-coated.

Programming Method

Front panel & Free PC-based USB programming software.

Digital Input

2.1V DC on contact. No contacts across DI+ and DI-.

Logic High: 2.4 to 30V DC (max).

Logic Low: 0 to 0.9V DC.

Overall Dimensions

4.68" x 2.45" x 3.79" (119 x 62 x 96 mm) W x H x D.

Weight

8.7 oz (247g) with option board.

Warranty

3 years parts and labor.

UL/cUL Approvals

General purpose: UL 61010-1.

Hazardous area: Class 1, Div 1, Groups A, B, C, D and

Class 1, Div 2, Groups A, B, C, D.

Input

Inputs

4 to 20mA.

Accuracy

±0.02% of span ±1 count.

Square root/ exponent: 10-100% FS.

Voltage Drop

Without Backlight: 1.5V max. With backlight: 4.5V max.

Function

PV1: Linear, square root, or programmable exponent.

PV2: Linear or round horizontal tank.

HART Transparency

Analog input will not interfere with existing HART communications on the wired 4-20 mA signal.

Display

Display

Dual-line LCD with backlight. Both lines 14-segment alphanumeric. Top: 0.7" (17.8 mm), Bottom: 0.4" (10.2 mm).

Display may be programmed to turn red and flash a user-defined message on alarm condition.

Decimal Point & Commas

Top line: Up to four decimal places.

Bottom line: Up to seven decimal places and commas to indicate 1000s (e.g. 88,987,628).

Dual-Scale Feature

Input can display in different scales on top and bottom lines.

Top line could display input in height and bottom line displays same input in volume.

Tel 877-214-6267 ■

DisplayWizard LP Programming Software

DisplayWizard LP System Requirements

Microsoft® Windows® 7 & 10.

Communications

USB 2.0 (Standard USB A to Micro USB B).

Common Open Collector & Relay (Alarm)

High or Low Alarm

User programmable for high or low alarm.

Alarm Deadband

0-100% FS, user programmable.

Pulse, alarm, timer, stopwatch on/off, or disable.

On & Off Time Delay

0 to 9,999 seconds.

Fail-Safe Operation

Independent for each open collector and relay.

Fail-safe on: output is on under normal conditions.

Fail-safe off: output is on under alarm conditions.

Alarm Operation

Automatic, automatic with manual override, latching (manual reset anytime), latching with reset after cleared (manual reset only after alarm has cleared).

Under/Over Range

If input < 3.5 mA: 1.0, 3.5, 3.8 mA, or disabled.

If input > 20.5 mA: 20.5, 20.8, 23.0 mA, or disabled.

Open Collector Outputs

Rating

Isolated, sinking NPN, 5-30V DC @ 150mA max.

Solid State Relays

Rating: 250VAC/VDC @ 1A resistive.

75VA; 250VAC; 0.6A pilot duty (inductive) – UL Code D300.

25VA; 250VDC; 0.6A pilot duty (inductive) – UL Code R300.

Pump Alternation

Relays will alternate with each pump cycle and alternation can be based on elapsed time. Pump alternation time can be programmed for: 0 to 999:59 (hrs:min).

4-20mA Transmitter Output

Accuracy

±0.05% FS ±0.001mA.

Scaling Range

1.00 to 23.0 mA.

Under/Over Range

If input < 3.5 mA: 1.0, 3.5, 3.8 mA, or disabled.

If input > 20.5 mA: 20.5, 20.8, 23.0 mA, or disabled.

Isolation

500 V input-to-output.

External Loop Power Supply

7.0 VDC to 30.0 VDC maximum.

Output Loop Resistance

10-750 Ω @ 24 VDC; 100-1100 Ω @ 30 VDC.
