

**DUT-E S7 transmits data on fuel level/volume simultaneously to several devices: telematics unit, smartphones, tablets.**

**No cable**  
Increased resistance to vandalism.

**No cable**  
Quick installation of sensor and telematics unit.

**No cable**  
Explosion- and fire-safety of sensor.

### Specifications

Data transfer technology	S7 (based on BLE)
Sensor length	700, 1000 mm
Sensor's length shortening from initial length	by 90%
Sensitivity to fuel level change	0.1 mm
Signal transmission range on the line of sight	50 m
Quantity of sensors in single network	up to 8
Quantity of receivers (telematics units, Android-based devices)	up to 8
Data transmission interval	5 s
Increasing sensor length	up to 6000 mm
Warranty period	60 months
