

# Charger/24VDC Supplies

The chargers consist of an input automatic changeover switch, an auto transformer, rectifier modules, and output distribution

The rectifier provides a high quality nominal 24V output at the rated load from a 440V 3phase 60Hz supply. The rectifier uses switched mode rectifier modules configured in parallel to produce the regulated output suitable for charging valve regulated lead acid batteries. In the event of failure of the ship's normal ac supply, the input will be switched automatically to the emergency supply.

The charger distribution consists of 2pole miniature circuit breakers

Built into steel enclosures for deck or bulkhead mounting, the chargers are suitable for shock levels up to 15g. Above this suitable shock mounts can be used.

Ingress Protection level is to IP23, suitable for electrical compartments or IP44 suitable for machinery spaces

#### **ELECTRICAL CHARACTERISTICS**

440 volts 3 phase 3 wire 60Hz in accordance with STANAG 1008 Edition 8 and Lloyds NSR

Input Rated Voltage 440V Input Current THD <4% Power Factor 0.99 Inrush Current <Inom

Option: Normal/Emergency input supply with automatic changeover Option: Anti condensation heater, 115V or 230V

Output

27.4V DC nominal 26-32V adjustment Temperature compensated for battery float voltage

Voltage Regulation

<50mV pk-pk Ripple and noise Voltage transients <20% (75% load step) Voltage recovery time <100ms (75% load step) > 10Mohm Isolation

Option: Earth isolation monitor Option: Fixed 24VDC output

I oad

Output Power: up to 10kW

Efficiency >87%

#### Protection

Inputs fused, output current limited, over-voltage trip, overtemperature trip.

### Local Controls and Indications.

Supply ON/OFF selector switch Equalise battery voltage switch Output Voltmeter

Output Ammeter Output voltage adjust

Normal Supply Available, Emergency Supply Available, ACH On, Fan Fail, Current limit, Overvoltage, Overtemperature, Output On and Earth Fault LEDs

## Remote Indications.

Fault, Output ON, and Alarm remote indication by means of volt free contacts.

Options: Interface with battery alarms when used in conjunction with the BB range of Battery Boxes

# **MECHANICAL FEATURES**

#### Enclosure

Fabricated mild steel folded and welded for strength. Deck/bulkhead mounted with lifting eyes.

# **Cable Entry**

Top/bottom via gland plate.

User connections are made to internal rail mounted and stud terminals. Access for the cables is by a gland plate that can be drilled or punched as required for glands.

#### Ingress Protection Rating

IP23 suitable for electrical equipment compartment IP44 suitable for machinery spaces IP54 fitted with dust filters

### Cooling

Fan assisted by two speed fans. Fan failure detection

#### Maintenance

Front maintenance - Hinged door for access.

### Internal wiring

Low fire hazard cross linked polyolefin RADOX 125.

For safety the chassis of the UPS must be earthed. An external M10 earth stud is situated adjacent to the gland plate.

#### **ENVIRONMENTAL CHARACTERISTICS**

#### Shock

Designed to meet a shock requirement of 15g in each of three orthogonal directions when solidly mounted. For installed shock levels in excess of this shock mounts should be fitted.

#### Vibration.

Designed to meet the shipboard vibration requirements. Typically 5 to 33Hz +/- 0.125mm

#### Noise

< 60dbA @1m

#### **Electromagnetic Compatibility**

Designed to meet the requirements of Def Stan 59-411. Emissions and susceptibility (Below deck limits)

#### **Ambient Temperature**

0°C to + 45°C

#### Relative Humidity

10% to 95% non-condensing

The equipment is designed to withstand, without damage or degradation of performance or spillage of fluids, ship motion due to the action of the sea and weather as well as accelerations and velocities deriving from deliberate ship manoeuvres. Typically:

> Roll angles ± 30° Pitch angles ± 10° Steady list angles  $+ 15^{\circ}$ Steady trim angles  $+5^{\circ}$
